

PLANTING GUIDE

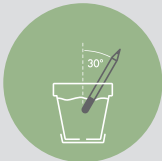

WHEN YOU PLANT YOUR SPROUT PENCILS, PLEASE FOLLOW THE STEPS BELOW TO GET THE BEST RESULT:

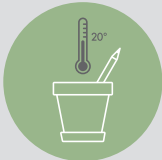

1. Use a pot with a hole in the bottom, a saucer and a good potting soil.

2. Water the soil so it is moist, but not soaking wet.

3. Plant the pencil slightly tilted to a 30 degree angle, capsule down. Don't plant too deep, only cover the capsule by soil.

4. Place the pot in a light place. Avoid direct sunlight. Temperatures around 20° C is optimal.

5. Remember to water regularly. We recommend bottom watering. Germination will occur within 1-4 weeks.
